

Random Number Generator Certificate

Operator: Taj Rummy

Operator URL: www.tajrummy.com

Software Provider: Grid Logic Software Private Limited

Software Provider URL: www.gridlogic.in

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) used by Taj Rummy and found that the RNG complies with the relevant standards.*

The RNG uses a well known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has also evaluated the shuffling tests for 2 deck games. The shuffling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the card sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

Signed:

A handwritten signature in black ink, appearing to read "Ian Manning", written over a horizontal line.

Ian Manning
Principal Consultant
iTech Labs Australia

15 March 2013

* The RNG was tested according to the UK Gambling Commission standards.

Disclaimer.

While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
